Tim Elliott, Kuang-hua Chen, Robert Swanekamp. Published 1998. ORP And Corrosion. Conclusions. Power Plant Chemistry Measurement Advancements: Oxidation Reduction Potential. Abstract. Measurements which show the potential for corrosion of a plant's metallurgy due to interaction with the system water have gained in importance within the last two decades. Among the most successful of these measurements are those which measure an actual potential which is based upon the oxidation/reduction reactions taking place. The measurement of Oxidation Reduction Potential (ORP) has been used extensively in both nuclear and fossil fuel power plants to show the potential
