Jeffrey Carpenter's 41 research works with 1,313 citations and 2,460 reads, including: Preferences and Civil War in Northern Uganda: Post-Traumatic Growth Reconsidered. There is now an extensive literature on "gift exchange" showing that when principals and agents can trade "gifts" (rewards that should not emerge in a competitive equilibrium), exchange becomes more efficient. However, it is not obvious how gift exchange should be organized if the principal's goal is to increase the performance of a reciprocal agent.
