Bush Administration policies are not only a "great catastrophe" but the products of a disturbed mind, according to this provocative blend of psychological case-study and partisan polemic. Psychoanalyst Frank sifts through family memoirs, the writings of critics like Al Franken and David Corn and the public record of Bush's personal idiosyncrasies for clues to the President's character, interpreting the evidence in the rigidly Freudian framework of child psychoanalyst Melanie Klein. One's opinion of "Bush on the Couch" will be formed solely by the reader's PRIOR viewpoint on the President. BOC is certain to change no opinions, only to harden them. As proof, look at the plethora of one star OR five star ratings below.

Includes bibliographical references and index. The first family -- Affability and disability -- Message in the bottle -- In God I trust -- Outlaw -- The smirk -- Twisted tongues -- Oedipus wrecks -- He's our man -- I am the chief. Presents a psychological profile of George W. Bush, tracing the development of his character from childhood to the present, examining his patterns of thought and behavior, and discussing if he is psychologically fit to run the nation. "Trump On The Couch has spared me the extra grief of hoping against hope that our President will change. Dr. Frank's analysis helps explain the genesis of Trump's bullying, cruelty, dismissiveness, sexism, sadism, narcissism and more to help us understand that very sick man. Now I can brace myself in a more efficient way - not teetering between disbelief and denial but accepting what is, and continuing to resist." Dr. Frank has previously published similar books about two previous presidents of the United States: (1) *Bush on the Couch: Inside the Mind of the President*, 2nd ed. (New York: Harper, 2007; orig. ed., 2004); (2) *Obama on the Couch: Inside the Mind of the President* (New York: Free Press/ Simon & Schuster, 2011).
