His history of the global variety is largely a debunking, and much of his thesis boils down to the suggestion that, since scientists in the past have frequently believed things that have turned out not to be true – unremarkably, he cites phlogiston as an example – we should always seek to question the current paradigm. For his own interrogation of global warming’s hold on the scientific establishment, he relies on Karl Popper’s dictum that “only a theory which asserts that certain conceivable events will not, in fact, happen, is testable”; therein, he asserts, lies global warming’s weakness. Global warming is the ongoing rise of the average temperature of the Earth’s climate system and has been demonstrated by direct temperature measurements and by measurements of various effects of the warming. It is a major aspect of climate change which, in addition to rising global surface temperatures, also includes its effects, such as changes in precipitation. While there have been prehistoric periods of global warming, observed changes since the mid-20th century have been unprecedented in rate and whose fault is global warming? Not man’s, thunders the author of this study. Our reviewer remains unconvinced. Richard Girling. Like the Chinese delegates at the disastrous Copenhagen climate summit, he has a pedant’s mastery of textual and historical detail, reinforced by 66 pages of notes. Every scrap of the warmist agenda (and he really does mean agenda, in the sense of a political purpose) is seized by his crunching. Back to top.

A definitive and clear-eyed history of global warming alarmism --Michael Barone. 'Like most of those on both sides of the debate, Rupert Darwall is not a scientist. He is a wonderfully lucid historian of intellectual and political movements, which is just the job to explain what has been inflicted on us over the past thirty years or so in the name of saving the planet. Scientists, Rupert Darwall complains, have been too ready to embrace the "subjectivity" of the future, and too often have a "cultural aversion to learning from the past". If they read this tremendous
